CONTENTS

Volume 14, Issue Nos. 1–12 (1992)

International Journal for
NUMERICAL METHODS IN FLUIDS

Issue No. 1, 15 January

A Helmholtz Pressure Equation Method for the Calculation of Unsteady Incompressible Viscous Flows: M. Williams 1

Three-dimensional Streamlined Finite Elements: Design of Extrusion Dies: K. R. J. Ellwood, T. C. Papanastasiou and J. O. Wilkes 13

A One-dimensional Moving Grid Solution for the Coupled Non-linear Equations Governing Multiphase Flow in Porous Media. 1: Model Development: A. Gamliel and L. M. Abriola 25

A One-dimensional Moving Grid Solution for the Coupled Non-linear Equations Governing Multiphase Flow in Porous Media. 2: Example Simulations and Sensitivity Analysis: A. Gamliel and L. M. Abriola 47

Iterative Methods for Stabilized Mixed Velocity–pressure Finite Elements: J. Atanga and D. Silvester 71

Heat Transfer During Melting in Rectangular Enclosures—A Finite Element Analysis: A. Sarkar and V. M. K. Sastri 83

Parallel Algorithms for Panel Methods: T. David and G. Blyth 95

A Comparison of Spatial Grids for Numerical Modelling of Flows in Near-coastal Seas: R. W. Lardner and Y. Song 109

CONFERENCE DIARY 125

Issue No. 2, 30 January

Towards the Numerical Simulation of the Horizontal Slug Front: N. Yacoub, D. M. Maron and D. Naot 127

Domain Decomposition Methods in Computational Fluid Dynamics: W. D. Gropp and D. E. Keyes 147

A Numerical Method for the Determination of Slip Characteristics Between the Layers of a Two-layer Slurry Flow: V. Nassehi and A. R. Khan 167

A Fire Field Model Implemented in a Parallel Computing Environment: C. S. Ierotheou and E. R. Galea 175

A Slope Modification Method for Shallow Water Equations: V. S. Rao and G. Latha 189

Indexed or abstracted by 'Applied Mechanics Reviews', 'Boundary Elements Abstracts', 'Cambridge Scientific Abstracts', 'CITIS—Civil Engineering Abstracts', 'Compumath Citation Index', 'Current Contents', 'Engineering Index Inc', 'Eng. Societies Library', 'BHRA Fluid Engineering Centre', 'Geographical Abstracts: Physical Geography', 'Geological Abstracts', 'INSPEC', 'Mathematical Reviews', 'Mechanics', 'Newsletter of Eng. Analysis Software', 'SCISEARCH Database', 'Shock & Vibration Digest' and 'Zentralblatt für Mathematik'.

Surface Tension and Buoyancy-driven Flow in a Non-isothermal Liquid Bridge: Y. Zhang and J. I. D. Alexander 197

Hot Flow Analysis of Swirling Sudden-expansion Dump Combustor: S.-H. Chuang, H.-C. Lin, F.-M. Tai and H.-M. Sung 217

Computation of Axisymmetric Confined Jets in a Diffuser: J. Zhu and W. Rodi ... 241

Issue No. 3, 15 February

A Numerical Study of Bifurcation in Laminar Flow in Curved Ducts: S. Jayanti and G. F. Hewitt 253

Simulation of Supersonic and Hypersonic Flows: J. F. Milthorpe 267

A Preconditioned Conjugate Gradient Uzawa-type Method for the Solution of the Stokes Problem by Mixed Q1–P0 Stabilized Finite Elements: C. Vincent and R. Boyer 289

Compressible Gas Flow between Closely Spaced Plates: Z. P. Mourelatos 299

Numerical Prediction of Vortex Shedding behind a Square Cylinder: K. M. Kelkar and S. V. Patankar 327

Transient Finite Element Method for Calculating Steady State Three-dimensional Free Surfaces: O. Wambersie and M. J. Crochet 343

An Accurate Computation for Rapidly Varied Flow in an Open Channel: J.-C. Yang, K.-N. Chen and H.-Y. Lee 361

CONFERENCE DIARY 375

Issue No. 4, 28 February

The Application of the Method of Characteristics for the Simulation of Nearly Horizontal Flow in Two and Three Spatial Dimensions: P. F. C. Matsoukis 379

Computation of Waves Generated by Submarine Landslides: M. Verriere and M. Lenoir 403

Finite Volume Computation of the Turbulent Flow Over a Hill Employing 2D or 3D Non-orthogonal Collocated Grid Systems: P. J. Coelho and J. C. F. Pereira 423

Periodic Solution of Turbulent Oscillating Channel Flows: Z. Qin and M. D. Olson 443

Numerical Simulation of Twin-jet Impingement on a Flat Plate Coupled with Cross-flow: S.-H. Chuang, M.-H. Chen, S.-W. Lii and F.-M. Tai 459

A Stable Algorithm for Bed Friction in Three-dimensional Shallow Sea Modal Models: A. M. Davies and J. N. Aldridge 477

SHORT COMMUNICATION

An Improved Finite Difference Scheme for a Newtonian Jet Swell Problem: T.-A. Yu and T.-J. Liu 495

CONFERENCE DIARY 503

Issue No. 5, 15 March

Cell Vertex Finite Volume Discretizations in Three Dimensions: P. I. Crumpton and G. J. Shaw 505

A Simple and Efficient BEM Algorithm for Planar Cavity Flows: L. C. Wrobel 529

The Numerical Solution of the Thin Film Flow Surrounding a Horizontal Cylinder Resulting from a Vertical Cylindrical Jet: R. Hunt 539

Multivariant Finite Elements for Three-dimensional Simulation of Viscous Incompressible Flows: M. Gupta, T. H. Kwon and Y. Jaluria 557

A New Outflow Boundary Condition: T. C. Papanastasiou, N. Malamataris and K. Ellwood 587

Prediction of Three-dimensional General Shape Extrudates by an Implicit Iterative Scheme: V. Legat, J.-M. Marchal 609

CONFERENCE DIARY 627

Issue No. 6, 30 March

Computation of Two-dimensional Dam-break Flood Flows: J. V. Soulis 631

Orthogonal Arrays: an Introduction and their Application in Optimizing Underrelaxation Factors in 'Simple'-based Algorithm: R. Gopinath and V. Ganesan .. 665

Numerical Method for Unsteady Viscous Hydrodynamical Problem with Free Boundaries: P. J. Shopov, P. D. Minev and I. B. Bazhlekov 681

Spectral Element–FCT Method for Scalar Hyperbolic Conservation Laws: J. Giannakouros and G. E. Karniadakis 707

A Least-squares Method for Solving the Mixed Form of the Groundwater Flow Equations: L. R. Bentley and G. F. Pinder 729

CONFERENCE DIARY 753

ANNOUNCEMENT 756

Issue No. 7, 15 April

A Hybrid Method for Computing the Flow of Viscoelastic Fluids: P. D. Ariel 757

A Modified Adaptive Grid Method for Recirculating Flows: D. Lee and Y. M. Tsuei 775

Energy Flux Equalization: An Open Boundary Condition for Non-linear Free Surface Flows: S. Jagannathan 793

A Finite Element Solution of Three-dimensional Mixed Convection Gas Flows in Horizontal Channels using Preconditioned Iterative Matrix Methods: E. O. Einset and K. F. Jensen 817

A Least-squares Finite Element Method for Incompressible Navier–Stokes Problems: B.-N. Jiang 843

A Structured Tri-tree Search Method for Generation of Optimal Unstructured Finite Element Grids in Two and Three Dimensions: S. Ø. Wille 861

Issue No. 8, 30 April

The Double von Mises Transformation in the Study of Two-phase Fluid Flow Over Curved Boundaries: Theory and Analysis: R. M. Barron and M. H. Hamdan 883

A Prediction of the Pressure Field in a Plane Turbulent Jet Using an Algebraic Stress Model: D. J. Bergstrom 907

Influence of Skirt Radius on Performance of Circular Clarifier with Density Stratification: S. Zhou and J. A. McCorquodale 919

An Extension of Osher's Riemann Solver for Chemical and Vibrational Non-equilibrium Gas Flows: R. Abgrall, L. Fezoui and J. Talandier 935

Simulating Two-dimensional Turbulent Flow by Using the k-ε Model and the Vorticity–streamfunction Formulation: D. Elkaim, M. Reggio and R. Camarero 961

Boundary-conforming Mapping Applied to Computations of Highly Deformed Solidification Interfaces: K. Tsiveriotis and R. A. Brown 981

CONFERENCE DIARY 1005

Issue No. 9, 15 May

Flux Difference Splitting for 1D Open Channel Flow Equations: F. Alcrudo, P. Garcia-Navarro and J.-M. Saviron 1009

Finite Element Modelling of Natural-convection-controlled Change of Phase: A. S. Usmani, R. W. Lewis and K. N. Seetharamu 1019

Laminar Fluid Convection Between Concentric and Eccentric Heated Horizontal Rotating Cylinders for Low-Prandtl-number Fluids: T. S. Lee 1037

Second-order Boundary Element Method Calculations of Hydrodynamic Interactions Between Particles in Close Proximity: C. Y. Chan, A. N. Beris and S. G. Advani 1063

Calculation of Two-dimensional Shear-driven Cavity Flows at High Reynolds Numbers: A. Huser and S. Biringen 1087

Non-linear Interaction of Water Waves with Submerged Obstacles: R. W. Yeung and M. Vaidhyanathan 1111

CONFERENCE DIARY 1131

ANNOUNCEMENT 1134

Issue No. 10, 30 May

Numerical Simulation of Fully Non-linear Steady Free Surface Flow: F. Lalli, E. Campana and U. Bulgarelli 1135

A Numerical Simulation of Boundary Layer Effects in a Shock Tube: K. J. Badcock 1151

A General Numerical Method for Solution of Gravity Wave Problems. Part 2: Steady Non-linear Gravity Waves: S. J. Liao 1173

River and Reservoir Flow Modelling Using the Transformed Shallow Water Equations: A. G. L. Borthwick and R. W. Barber 1193

Two-dimensional Wave Run-up Analysis by Selective Lumping Finite Element Method: T. Okamoto, M. Kawahara, N. Ioki and H. Nagaoka 1219

Conservative Monotone Streamline Upwind Formulation Using Simplex Elements: F. Shemirani and K. Jambunathan 1245

ANNOUNCEMENT 1259

Issue No. 11, 15 June

A Finite Difference Method for 3D Flows about Bodies of Complex Geometry in Rectangular Co-ordinate Systems: H. Miyata and Y. Yamada 1261

Application of a Vortex Method to Free Surface Flows: L. Chen and W. S. Vorus 1289

A Multigrid Method for Steady Incompressible Navier–Stokes Equations Based on Flux Difference Splitting: E. Dick and J. Linden 1311

An Extended k-ε Finite Element Model: M. Jaeger and G. Dhatt 1325

Boundary Element Method for Long-time Water Wave Propagation over Rapidly Varying Bottom Topography: A. Nachbin and G. C. Papanicolaou 1347

A New Decoupled Finite Element Algorithm for Viscoelastic Flow. Part 1: Numerical Algorithm and Sample Results: S. J. Swarbrick and V. Nassehi 1367

A New Decoupled Finite Element Algorithm for Viscoelastic Flow. Part 2: Convergence Properties of the Algorithm: S. J. Swarbrick and V. Nassehi 1377

CONFERENCE DIARY 1383

ANNOUNCEMENT 1386

Issue No. 12, 30 June

REFEREES FOR 1991 1387

Improved Artificial Dissipation Schemes for the Euler Equations: M. P. Thomadakis and S. Tsangaris 1391

Adaptive h-refinement on 3D Unstructured Grids for Transient Problems: R. Löhner and J. D. Baum 1407

A Coding Error Elimination Procedure for Validating Isotropic Turbulent Convection Numerical Calculations in Axisymmetric Flows with Eulerian and Lagrangian Descriptions: D. A. Blank 1421

An Inviscid/viscous Coupling Approach for Vortex Flow Field Calculations: K. D. Lee and S. A. Brandt 1437

Numerical Simulation of Jet-forced Flow in a Circular Reservoir Using Discrete and Random Vortex Methods: A. G. L. Borthwick and R. W. Barber 1453

Numerical Investigation of Confined Wakes Behind a Square Cylinder in a Channel: A. Mukhopadhyay, G. Biswas and T. Sundararajan 1473

A Study of Laminar Air Flow Through Cracks by Numerical Solution of the Differential Equations: M. R. Mokhtarzadeh-Dehghan, A. J. Ward-Smith and R. N. Walker 1485

CONFERENCE DIARY 1497
